Developments: [Regulatory Fees: Increase for Radio & New Calculation for TV](#)
[FCC Adopts FM Translator Interference Rules](#)
[Mid-Term EEO Report Officially Eliminated](#)

FCC Proposes Fiscal Year 2019 Regulatory Fees; Proposal Includes Significant Hike in Fees for Radio & New Methodology for Calculating TV Fees

The FCC recently released a [Notice of Proposed Rulemaking](#) (“Notice”) in which it proposes regulatory fees for fiscal year (“FY”) 2019. Perhaps of greatest significance to broadcasters, the Notice (1) proposes regulatory fees for radio stations that are substantially higher than they were last year, and (2) seeks comment on the Commission’s new methodology for calculating full-service television stations’ regulatory fees in fiscal year 2019.

In all, the FCC proposes to collect \$339,000,000 from all regulatees, which represents a 5 percent increase in regulatory fees from fiscal year 2018. The allocation to the Media Bureau (which includes fees collected from radio, television, cable, and DBS operators) is about \$121.8 million.

Proposed Amounts for Broadcasters. Radio stations may find themselves suffering from sticker shock when they review the Notice’s proposed fees. According to [NAB](#), the fees for radio stations are, on average, 20% higher than they were last year. While the spike may be attributed in part to what had been a one-time fee reduction for radio stations in FY 2018, NAB is asking that the FCC issue another notice that fully explains the year-over-year increase from 2018 to 2019.

Attached to this memorandum please find a series of “schedules” that set forth (or, in the case of TV, guide you toward) the proposed regulatory fees of greatest interest to broadcasters:

- Schedule A contains a table of the proposed FY 2019 regulatory fees for radio stations (and, for the sake of comparison, it also includes a table of the final FY 2018 fees that radio stations paid last year). As mentioned, the proposed FY 2019 regulatory fees for radio stations are higher than they were last year and are close to what they were for FY 2017; there was a one-time decrease in regulatory fees for radio stations in 2018.
- Schedule B contains a hyperlink to the proposed FY 2019 regulatory fees for television stations. The 20-page document containing the proposed TV regulatory fees is also attached to this memorandum, following Schedules A, B, and C. As discussed in detail below, the Commission’s methodology for calculating TV stations’ fees has changed. Schedule B also includes a table of the final FY 2018 fees that television stations paid last year.
- Schedule C contains a table of other proposed FY 2019 regulatory fees that affect broadcasters; it too includes a table of such fees assessed in FY 2018.

Change in Methodology for Television Broadcast Stations. In recent years, television broadcast stations paid regulatory fees based on the market they serve, as defined by Nielsen Designated Market Areas (DMAs). Last year, the FCC adopted a new methodology for how regulatory fees would be assessed for full-power broadcast television stations in 2019 and beyond. The new methodology bases calculations on the actual population served by the station’s noise limited service contour (“NLSC”), instead of DMAs. In order to facilitate the transition to the new fee structure, the FY 2019 regulatory fees take into account both DMA-size and the actual population covered by the station, based on the station’s NLSC.

As such, the FCC’s proposed FY 2019 fees for full-power television stations are calculated on an average of:

- (1) the fee that would be assessed using the DMA methodology; and
- (2) the fee that would be assessed using the actual-population methodology (which is calculated using the population covered by the station’s projected NLSC, multiplied by a factor of \$.007224).

The 20-page PDF file attached at the end of this memo lists, by TV station call sign, the population data, the population-based fee, the DMA-based fee, and the resulting proposed regulatory fee for FY 2019 (i.e., the average of the DMA-based fee and the population-based fee) for each full-power broadcast television station, including each satellite station. The same information can also be found in the Notice’s Appendix C (which can be found at www.fcc.gov/licensing-databases/fees/regulatory-fees). Note that, for some stations, the proposed fee for FY 2019 is drastically different than its FY 2018 fee.

Payments By Check Will Not Be Accepted. The Commission will not accept regulatory fee payment by check (including cashier’s checks and money orders) or by hardcopy “remittance

“advice” forms (e.g., FCC Forms 159, 159-B, 159-E, 159-W). Instead, all payments must be made by wire transfer or online via ACH (Automated Clearing House) payment, or credit card. Other forms of payment will be rejected. Further payment procedure details will be provided later when the FCC issues a public notice announcing the regulatory fees payment window.

Maximum Credit Card Transaction Level. As has been the case for several years now, the maximum amount that can be charged on a credit card for transactions with federal agencies—including the FCC—is \$24,999.99. Attempted transactions for amounts greater than \$24,999.99 will be rejected. This limit applies to single payments, divided payments, and to combined payments of more than one bill.

In other words, the FCC will aggregate multiple transactions attempted on one credit card on one day and treat them as a single transaction subject to the \$24,999.99 limit, and the FCC will not permit a broadcast licensee to divide a transaction over multiple days in order to create smaller payments that would fall below the \$24,999.99 limit each day. Thus, broadcasters who need to pay an amount greater than \$24,999.99 will need to use debit cards (Visa or MasterCard) or make payment by ACH or wire transfer.

Limited Exemption for De Minimis Regulatory Fees. The FCC exempts regulated entities from paying regulatory fees when their total fee obligation is considered “*de minimis*.” The *de minimis* threshold is currently \$1,000. This means that broadcasters (and other regulated entities) whose total FY 2019 annual regulatory fee liability is \$1,000 or less are exempt from payment of FY 2019 regulatory fees. The *de minimis* threshold applies only to filers of annual regulatory fees, and it is not a permanent exemption. So, each licensee must reevaluate its total fee liability each fiscal year to determine whether its meets the *de minimis* exemption in any particular year.

Regulatory Fee Payment Window and Deadline. As in past years, after the FCC finalizes and adopts the regulatory fees, it will announce, in a public notice, a window during which regulatory fees may be paid, along with a deadline for making timely payment. The deadline traditionally falls in September. We will keep you apprised of developments.

Broadcasters who wish to weigh in on the proposed regulatory fee amounts, the TV station methodology for FY 2019 regulatory fee calculations, and/or any other aspect of the Notice must file comments by June 7, 2019, and reply comments by June 24, 2019.

FCC Adopts Order to Revise FM Translator Interference Rules and Procedures

At its open meeting earlier this month, the FCC adopted a Report and Order (the “Order”) that streamlines the rules relating to FM translator interference vis-à-vis full-power FM stations and should expedite the complaint resolution process. You may recall that we previously reported on a draft of the Report and Order. The final Order adopts most of the proposals included in the draft; it does, however, make some changes, including reducing the number of listener complaints that are needed to sustain an interference complaint in the largest markets.

Note that it may take several months for the rules adopted in the Order to become effective, as the Office of Management and Budget must approve many of them. We'll keep you posted on the Order's effective date.

The Order comes in response to an FCC Notice of Proposed Rulemaking issued last year, which acknowledged that the proliferation of FM translator operations (especially for AM stations) has increased interference, interference complaints, and the need to bring greater structure to the interference resolution process. FM translators are a secondary service and, as such, under the current FCC rules, they must not cause predicted or actual interference to any authorized broadcast station at any time or anywhere. However, under the rules in place today, it only takes one listener complaint of translator interference to get the Media Bureau Staff involved. But the process of resolving the complaint can take months, or even years. In some cases, the Media Bureau Staff may ultimately send an interference remediation letter to the FM translator licensee requiring that (i) the interference to the full-power FM station be eliminated, (ii) listener complaints be resolved, and (iii) a detailed interference resolution report be filed.

The Order explains that the complaint resolution process can drag out due to questions regarding the validity of the interference and the impartiality of complaining listeners. The Order aims to reduce the often uncertain and contentious nature of the resolution process by implementing the following rules:

- *Listener Complaints Claiming Translator Interference:*
 - Minimum number of listener complaints. The Order increases the number of listener complaints required to trigger interference remediation processes (up from the current minimum threshold of one complaint). The Order adopts a staggered approach, under which the minimum number of complaints necessary to trigger remediation ranges from 6 to 25, depending upon the size of the population served by the station that is experiencing the interference. The Order establishes 6 complaints as the minimum number required (except in the special case of LPFM stations serving fewer than 5,000 people, where only 3 complaints are needed). Beyond that, the Order adopts a formula under which, essentially, an additional complaint is needed for every 100,000 people in the station's service area; however, the maximum number of complaints required is capped at 25 for stations with more than two million people in their protected contour. That 25-complaint maximum reflects a change from the draft of the Order; the draft had proposed that 65 complaints would be needed to trigger remediation for stations with the largest audiences.

For a complaint to "count," it must be based on a unique receiver located at a unique location (i.e., multiple listener complaints from a single building or workplace will not count beyond the first complaint toward the six-complaint minimum). Additionally, listener complaints must be dated within one year of each other in order to count, and no complaints dated more than 12 months prior to the date that a complaint is submitted to the FCC will "count."

- Contents of complaint. In addition, in order to be considered a legitimate complaint that “counts,” a complaint must include: (1) the listener’s full name, address, and telephone number; (2) the location of the alleged interference; (3) a statement by the listener that he/she listens to the allegedly affected station using an over-the-air signal at least twice a month; (4) a statement by the listener that he/she has no legal, employment, financial, or familial affiliation or relationship with the complaining station; and (5) the signature of the complainant.

The current rules/process do not require this amount of detail in a listener complaint. The Order additionally clarifies that listeners who are offered payment or any inducement in exchange for filing a complaint will not “count.”

- Additional requirements from station complainants. If the complainant is a station, then the complaint must also include: (1) a map plotting the specific locations of the alleged interference in relation to the complaining station’s 45 dBu contour (more information on the new contour limit is below); (2) a statement that the complaining station is operating within its licensed parameters; (3) a statement that the complaining station licensee has used commercially reasonable efforts to inform the relevant translator licensee of the claimed interference and has attempted private resolution thereof; and (4) U/D data demonstrating that at each listener location the ratio of undesired to desired signal strength exceeds -20 dB for co-channel situations, -6 dB for first-adjacent channel situations, or 40 dB for second- or third-adjacent channel situations, calculated using the FCC’s standard contour prediction methodology.
- Contour Limit on Complaints: One of the most contested items in this proceeding centered around whether and to what extent the FCC should limit the geographic protection for full-power FM stations vis-à-vis FM translators; there is no contour limit under the current rules. The FCC initially proposed a 54 dBu contour limit, but the Commission ultimately settled on a 45 dBu contour limit in the Order, meaning that interference complaints outside of a full-power station’s 45 dBu contour will not be considered actionable (except on a waiver basis, as noted below). In adopting the 45 dBu contour rule, the Order rejected Longley-Rice and other terrain-based propagation modeling systems in favor of defining the 45 dBu contour area using the Commission’s standard contour prediction methodology.

The FCC will consider interference complaints beyond the 45-dBu contour on a case-by-case waiver basis. Such a waiver will be granted only if the full-power FM station requesting such a waiver can demonstrate special circumstances, including at least 20 listener complaints outside of the geographic area covered by the 45-dBu contour. The FCC will also take into account other relevant factors, such as geographic features, power/directionality, and listener expectation of service when considering a waiver request.

- Channel Changes: The Order allows FM translators to remediate interference by changing their channel to any available same-band frequency and classifies such a channel change as a “minor change.” (Normally, significant frequency changes constitute “major changes” that may only be filed during a designated filing window.)

- *Remediation Procedures and Timeline:* If a channel change cannot resolve the alleged interference, the FM translator station must follow additional remediation procedures. In establishing these procedures, the Order tries to balance the desire for listeners to continue to play a part in the resolution process against the concern that requiring listener cooperation with FM translator stations may promote negative interactions between translator operators and listener complainants. Accordingly, the Order eliminates the current requirement that listeners cooperate with FM translator operators, and, instead, it permits interference resolution between FM translator operators and “willing listener complainants.” The FCC hopes that this “willing listener” approach may help minimize “aggressive tactics that are designed to discourage the complainant rather than resolve the interference.” If a complaining listener declines to be involved in the resolution process, then the FM translator operator must instead resolve the interference by working with the station subject to the interference.

Finally, the Order establishes a deadline of 90 days for the FCC Staff to resolve an interference complaint, unless there is a compelling reason to delay. It appears that the FCC will let parties know once it has received the required number of complaints and will set deadlines for completing steps toward remediation.

Again, the Order likely won’t take effect for several months; we’ll let you know once the effective date for the new interference resolution process is set.

EEO Mid-Term Report Officially Eliminated

Finally, broadcasters now have one less report to worry about, as the Mid-Term Equal Employment Opportunity (“EEO”) Report, known as the Form 397 report, is officially gone. You may recall that the FCC adopted a [Report & Order](#) (“Order”) in February 2019 to eliminate the Mid-Term EEO Report; the requirement to file the Mid-Term EEO Report was officially eliminated on May 15, 2019.

Stations will recall that the FCC conducts a review of television stations in employment units at least five full-time employees and of radio stations with at least eleven full-time employees around the midpoint of such stations’ eight-year license terms.

In the Order, the Commission concluded that the Form 397 is almost entirely redundant in this era when all broadcasters are required to use the Online Public Inspection File (“OPIF”). Almost all of the information called for on the Mid-Term EEO Report is already otherwise available in the OPIF. In fact, the only piece of information gathered via the Form 397 that is not readily available in a station’s public file is a certification from the station as to whether it has the requisite number of full-time employees to be subject to a mid-term review in the first place.

In order to gather that information in the absence of the Form 397, the Commission will modify the OPIF to enable radio broadcasters to provide it in a simple manner and allow FCC staff to quickly identify those stations subject to a mid-term review. Prior to the next mid-term cycle, the FCC will modify the OPIF to prompt radio licensees to answer “Yes” or “No” regarding whether they have eleven or more full-time employees when they are uploading their annual EEO

Public File Report. (All TV stations that are required to upload an annual EEO Public File Report necessarily have five or more full-time employees and thus automatically trigger the mid-term review requirement; the very act of filing the Public File Report will identify such stations.)

To clarify: the FCC will still conduct mid-term reviews of television stations with at least five full-time employees and radio stations with at least eleven full-time employees. And, all television and radio stations with at least five full-time employees will still have to complete the annual EEO Public File Report.

If you have any questions concerning the information discussed in this memorandum, please contact your communications counsel or any of the undersigned.
